

### Data Sheet (November 2021)

# **Product family Introduction**

Nuroll Peelable film is a bi-axially oriented polyester (BOPET) film with an amorphous polyester heat seal layer. It is specially designed for heat sealable lidding application on packaging refrigerated and frozen foods.

Nuroll Peelable film shows also an excellent hot-tack for hot filling process. It can be placed at temperature down to -60 °C and up to 200°C, and it is designed for self opening during cooking, when temperature goes over 90°C.

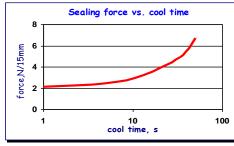

Nuroll Peelable film is dual ovenable, pasteurizable and provides strong, consistent peeling to substrates such as APET, CPET, PETG and PVC in all the usual conditions.

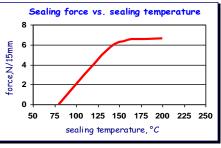

The heat seal layer is available in 2 different thicknesses,  $2\mu m$  (**PPL** grade) and  $3,5\mu m$  (**PPH** grade).

Nuroll Peelable is commercially available also with **anti-fogging** characteristics to assure more clarity and transparency when stored in refrigerators.

#### **Sealing properties**

Nuroll Peelable film shows a very good seal immediately after the sealing (hot tack properties), for this reason it represents the right choice for hot filling and MAP packaging applications. Its particular formulation guarantees a good seal without stress the shredding behavior.

# Peelable PPL / PPLA

#### **Product description**

**Nuroll PPL** is widely used when good sealability is requested but the tray substrate is not complex and the filling process does not dirt the sealing area (by powder, fats or liquids).

**Nuroll PPL** is commercially available in nominal thicknesses (plain film) of 23, 36 microns. For different thicknesses it is necessary to agree a minimum order and to full chart the mother roll width.

**Nuroll PPL** is commercially available also with anti-fogging characteristics (PPLA) to assure more clarity and transparency when stored in refrigerators

Cheeses, salted meats, dried food

### **Technical details**

Nuroll PPL/PPLA is usually supplied with following characteristics:

**Core diameter**: 6 inches (152.76 mm)

**#Film width**: min 400 mm, max 1400mm

**#Film length**: According with film thickness and max external reel diameter 640mm

Film Thickness (microns)	23	36
Standard real langth (m)	8000	4000
Standard reel length (m)		8000

**Packing presentation** suspended reel; wooden endboards, lid and pallet; stretchable PE film

Different characteristics than the above on request

#### Storage conditions

Nuroll PPL/PPLA need to be stocked in a close warehouse and preserved from the light and from the humidity.

Reels must be not stacked.

Nuroll will not accept any responsibility for material older than 1 year from the delivery.

## Compliance with regulations

Polyester Film produced by Nuroll SpA, complies with EEC, Italian and FDA requirements on packaging for direct contact with foodstuffs

3. Due to many factors which may affect customer production process, including but not limited by different equipments and techniques used, PPL-PPLA film must be qualified before being used in any application.
